

Sub C3
30. (New) The disposable garment of Claim 19, wherein the targeted elastic material comprises a targeted elastic laminate including the low and high tension zones;

the low tension zone including a plurality of elastomeric first filaments, the low tension zone having a first basis weight;

the high tension zone including a plurality of elastomeric second filaments, the high tension zone having a second basis weight higher than the first basis weight;

the laminate further including a facing layer bonded to at least a first side of the low tension zone and a first side of the high tension zone.

31. (New) The disposable garment of Claim 30, wherein the elastomeric first and second filaments have different average filament sizes.

32. (New) The disposable garment of Claim 30, wherein the elastomeric first and second filaments have different filament densities.

33. (New) The disposable garment of Claim 30, further comprising a second facing layer bonded to a second side of the low tension zone and a second side of the high tension zone.

34. (New) The disposable garment of Claim 19, wherein the targeted elastic material comprises a targeted elastic laminate including the low and high tension zones;

the low tension zone including a plurality of elastomeric first filaments, the first filaments including a first elastomeric polymer composition;

(the) high tension zone including a plurality of elastomeric second filaments, the second filaments including a second elastomeric polymer composition;

the laminate further including a facing material bonded to at least a first side of the low tension zone and a first side of the high tension zone.

AI
35. (New) The disposable garment of Claim 34, wherein the first filaments and the second filaments each comprise a base polymer selected from the group consisting of styrene-isoprene-styrene block copolymers, styrene-butadiene-styrene block copolymers, styrene-ethylene/butylene-styrene block copolymers, styrene-ethylene-propylene-styrene block copolymers, polyurethanes, elastomeric polyamides, elastomeric polyesters, elastomeric polyolefin homopolymers and copolymers, atactic polypropylenes, ethylene vinyl acetate copolymers, single-site or metallocene catalyzed polyolefins having a density less than about 0.89 grams/cc, and combinations thereof.

Claims 19-35 are pending in the present application. New Claims 30-35 correspond to original Claims 5-10. The new claims are thus fully supported by the specification and original claims. No new matter has been added. No fee is due for this Amendment because the total number of claims has been reduced and the total number of independent claims has been reduced.

This election is made without traverse. Applicants specifically reserve the right to seek patent protection for non-elected subject matter by divisional application. If the Examiner feels that any issues remain regarding this Restriction Requirement, then Applicants' undersigned attorney would like to discuss the case with the Examiner. The undersigned can be reached at (847) 490-1400.

Respectfully submitted,

Melanie I. Rauch
